

Phase 5: WAF + Block SQLi/XSS

Step 1: WAF v2 (us-east-1) + block SQLi/XSS + CloudWatch alarm + proof of attacks

WAF & Shield > Protection packs (web ACLs) > Create protection pack (web ACL)

Create protection pack (web ACL)

Tell us about your app [Info](#)
Sharing your app category and app focus detail helps AWS recommend the best security protection.

App category

App focus

☒ **Both API and web**
App engages with users through both a website or mobile application along with programmatic means.

☐ **API**
App engages with users primarily through programmatic means.

☐ **Web**
App engages with users primarily through a website or mobile application interface.

Select resources to protect (1/1) [Info](#)

☒	Name	Type
☒	alb-boutiquemode	Application Load Balancer

Name and describe

Name
Used to identify this app protection and its CloudWatch metrics

Name cannot be changed later. valid characters are letters, numbers, and hyphens (-).

Description - optional

The description can have up to 256 characters.

Customize protection pack (web ACL) - optional [Info](#)

Logging destination [Info](#)
Where your logs will be stored for your rules.

Logging destination type

Amazon CloudWatch Logs log group
Select a log group in your account that begins with 'aws-waf-logs-' or create one in the Amazon CloudWatch console. You must use a log group that's associated with your account.

Protection packs (web ACLs) > boutiquemode-waf

✔ **Successfully associated resources to boutiquemode-waf**
Associating the following resources to boutiquemode-waf has succeeded:

- alb-boutiquemode (ARN: arn:aws:elasticloadbalancing:us-east-1:381491972385:loadbalancer/app/alb-boutiquemode/7647538c7e8520aa)

Add new rule for boutiquemode-waf

< Manage rules for boutiquemode-waf

Custom rule

Define custom criteria for web request inspection. Create complex logic with multiple rule statements.

AWS-managed rule group

AWS-managed rules protect against web exploits and bot traffic with pre-configured rule groups maintained by security experts.

AWS Marketplace rule group

AWS Marketplace rule groups are available by subscription through AWS Marketplace. Each of these rule groups is owned and managed by the AWS Marketplace seller.

Custom rule group

Use a rule group to combine rules into a single logical set.
